DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a memory card system for transferring data between a memory card and a host, classified in class 710, subclass 301.
 - II. Claims 21-23, drawn to transmitting a serial data stream between devices, classified in class 710, subclass 71.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are classified in different places and are not related. Claims 1-20 all deal with the way in which the memory cards are connected to the system, how they are addressed, and to a certain extent how the data is transferred between the memory card and a host. Claims 21-23 only deal with the transfer of serial data between two unspecified devices by serial to parallel and parallel to serial conversion. Therefore these groups of claims are directed to unrelated inventions.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
